# PITCHCOMBE, A4173 JUNCTION IMPROVEMENTS NEWSLETTER

## PROGRESS TO DATE

There has been significant progress on site since the Christmas break:

- Three way traffic light system has been reinstalled on site
- Permanent gas protection works have been completed to gas main
- New road construction is underway at Half Way Pitch
- New footpath installed along A46 to Painswick
- Over 200m of new kerbs have been installed throughout site

## LOOKING AHEAD

In the coming weeks we will complete the concrete retaining wall, associated earthworks and drainage.

Streetlighting ducts are to be completed and the new poles installed.

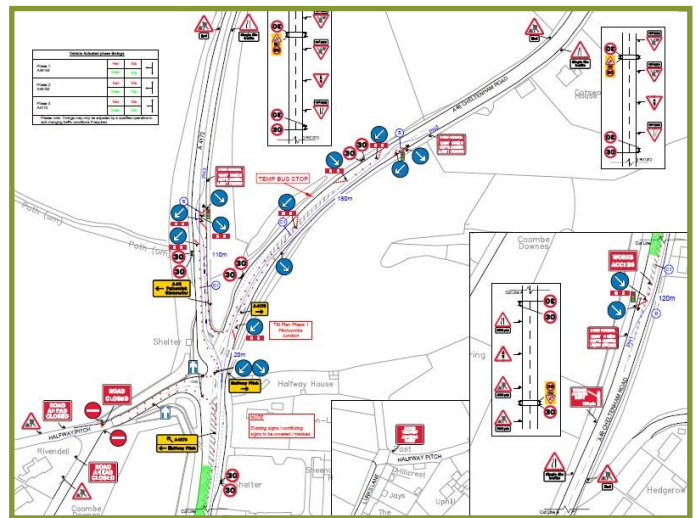

On going installation of kerbs, footpaths, including the new bus stop shelter.

We have a planned road closure on **Tuesday 4 February** for essential service installations.

## TRAFFIC MANAGEMENT

On Monday 27 January we will be changing the traffic management layout to allow works to progress in along the North bound verges of the A46 and A4173.

The working area will remain under three way traffic light control. The main difference you will notice is a change to the route for the one way system up Halfway Pitch and the relocation of the north bound bus stop on the A46.

The alterations will be done outside of peak times to try and prevent traffic delays but due to the nature of the work some disruption may be unavoidable . This is essential work and is required for the safety of all road users, the public and our workforce. We appreciate your patience and apologise for any disruption caused.
